

Endeavour

Following the young Endeavour Morse in his early days as an Oxford police constable working with CID, encountering Strange for the first time, and developing the notable personality traits he would latterly refine.

The Fall

Starring Emmy and Golden Globe award-winner Gillian Anderson, this gripping psychological thriller forensically examines the lives of two hunters... One a serial killer that stalks his victims at random and the other a high-powered detective superintendent brought in to catch him.

Acquitted

Businessman Aksel Borgen, formally acquitted of murder, returns to his hometown of Lifjord after 20 years to save an important local business, which is on the verge of bankruptcy. But his return reminds people about the unsolved murder.
